

of survey held at

Glasgow.

1.

s.s. "MIDDLESEX"

The First Entry Report on the machinery in this Office is the original report relating to engines made by Swan, Hunter & Wigham Richardson Ltd. at Newcastle in 1921.

As the request from Falmouth relates to Glasgow First Entry Report, I conclude this refers to new machinery which, according to 'E' Dept. records, was intended to be made by John Brown & Co., Clydebank, for this vessel.

I am therefore returning the Ltr.16 for your attention.

J. Corley
