

S.S. "CIUDAD DE BARCELONA" & CIUDAD DE PALMA"  
-----

These vessels were surveyed at Barcelona at the beginning of April for Convention freeboards.

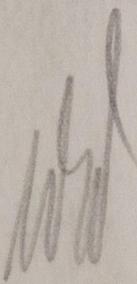

Convention freeboards were computed on the 13th April, 1934 and the computations forwarded to the Bilbao Surveyors for transmission to the Spanish Authorities for approval.

At the same time the Barcelona Surveyors were requested to forward further information to complete the report, and this information has now been received.

It is submitted that the Surveyors be informed with regard to Items 1 and 4 of their letter with the particulars are in order and could be accepted. With regard to item No.3 a plan of an approved underwater pattern sidelight should be forwarded for the Surveyors guidance and they should satisfy themselves that the sidelights are in reasonable compliance with this design.

If these sidelights do not conform to this standard, the Surveyors should advise this Office of the actual position of these sidelights relative to amidships in order that the freeboards may be amended if necessary. A copy of Circular No.1485 should be sent for their use.

A copy of the letter should be sent to the <sup>Bilbao</sup> ~~Oslo~~ Surveyors.
