

# REPORT ON ELECTRICAL EQUIPMENT.

(OTHER THAN FOR THE PROPULSION OF THE VESSEL)

Received at London Office

Date of writing Report 5th March 37 When handed in at Local Office 12.3.37 Port of Glasgow  
 No. in Survey held at Renfrew Date, First Survey 3.3.37 Last Survey 5.3.1937  
 Reg. Book. 2 (Number of Visits.....)  
 on the NON PROPELLING ROCK CUTTING BARGE "CAPRICORNE" Tons { Gross 323  
 Net 323  
 Built at Renfrew By whom built Lobnitz & Co. Ltd Yard No. 994 When built 1937  
 Owners Enterprise Onshore Port belonging to Goulon  
 Electric Light Installation fitted by J. Charteris Contract No. 994 When fitted 1937  
 Is the Vessel fitted for carrying Petroleum in bulk no

## System of Distribution

Two wires

Pressure of supply for Lighting

110

volts, Heating

volts, Power

volts.

Direct or Alternating Current, Lighting

Direct

Power

If alternating current system, state frequency of periods per second

Has the Automatic Governor been tested and found efficient when the whole load is suddenly thrown on or off

Yes

Generators, do they comply with the requirements regarding temperature rise

Yes

are they compound wound

Yes

are they over compounded 5 per cent.

Yes

if not compound wound state distance between each generator

Where more than one generator is fitted are they arranged to run in parallel

is an adjustable regulating resistance fitted in

series with each shunt field

Yes

Have certificates of test results for machines under 100 kw. been submitted and

approved

Yes

Have machines over 100 kw. been inspected by the Surveyors during manufacture and testing

Are all terminals accessible, clearly marked, and furnished with sockets

Yes

are they so spaced or shielded that they cannot be accidentally earthed,

short circuited, or touched

Yes

Are the lubricating arrangements of the generators as per Rule

Yes

Position of Generator

in machine space.

is the ventilation

in way of the generator satisfactory

Yes

are they clear of all inflammable material

Yes

if situated near unprotected

woodwork or other combustible material, state distance of same horizontally from or vertically above the generators

and

are the generators protected from mechanical injury and damage from water, steam or oil

Yes

are their axes of rotation fore and aft

Yes

Earthing, are the bedplates and frames of the generating plant efficiently earthed

Yes

are the prime movers and their respective generators

in metallic contact

Yes

Main Switch Boards, where placed

near generators.

If the generators and main switchboard are not placed in the same compartment, is each generator provided with a fuse on each insulated pole as near as possible to the terminals of the generator, additional to that provided on the main switchboard

Switchboards, are they placed in accessible positions, free from inflammable gases and acid fumes

Yes

are they protected from mechanical

injury and damage from water, steam or oil

Yes

if situated near unprotected woodwork or other combustible material, state distance of same

horizontally from or vertically above the switchboards

and

are they constructed wholly of durable, non-ignitable non-absorbent

materials

Yes

is all insulation of high dielectric strength and of permanently high insulation resistance

is it of an approved type

Yes

if semi-insulating material is used, are all conducting parts insulated from the slab with mica or micanite or other

non-hygroscopic insulating material, and the slab similarly insulated from its framework

Sindony

is the non-hygroscopic insulating material of an approved

type

Yes

and is the frame effectively earthed

Yes

Are the fittings as per Rule regarding:— spacing or shielding of live parts

Yes

accessibility of all parts

Yes

absence of fuses on back of board

Yes

temperature rise of

omnibus bars

Yes

individual fuses to voltmeter, pilot or earth lamp

Yes

are moving parts of switches alive in the

"off" position

no

are all screws and nuts securing connections effectively locked

Yes

are any fuses fitted on the live side of

switches

no

Main Switchgear, description of switchgear for each generator and each outgoing circuit, and arrangement of equalizer switches

D.P. switch & fuses for generator S.P. switch & D.P. fuses for each outgoing circuit.

Are turbine driven generators fitted with emergency trip switch as per rule

Are cupboards or compartments containing switchboards composed of

fire-resisting material or lined with approved material

Instruments on main switchboard

1 ammeter

voltmeter

synchronising device for paralleling purposes.

For compound machines is the ammeter connected on the opposite pole to equaliser connection

Earth Testing, state what means are provided at the main switchboard for indicating the state of the insulation of the system

Yes

Switches, Circuit Breakers and Fusible Cut-outs

do these comply with the requirements of the Rules

Yes

are the fusible cutouts of an approved type

Yes

have the reversal

current protection devices been tested under working conditions — **Joint Boxes, Section and Distribution Boards, is the**

construction, protection, insulation, material, and position of these as per Rule *Yes*

**Cables:** Single, twin, concentric, or multicore *Single twin* are the cables insulated and protected as per Tables IV, V, X or XI of the Rules *Yes*

If the cables are insulated otherwise than as per Rule, are they of an approved type — **Fall of Pressure, state maximum between bus bars and**

any point of the installation under maximum load *1.75 Volts.* **Cable Sockets, are the ends of all cables having a sectional**

area of 0.04 square inch and above provided with soldering sockets *All cables have 0.04 sq. ins.* **Paper Insulated and Varnished Cambric Insulated Cables.**

If conductors are paper or varnished cambric insulated, is the dielectric at the exposed ends of the conductor protected from moisture by being suitably sealed with

insulating compound — or waterproof insulating tape — **Cable Runs, are the cables fixed as far as possible in accessible positions**

not exposed to drip or accumulation of water or oil, or to high temperature from boilers, steam pipes, uptakes or other hot objects, or to avoidable risk of mechanical

damage *Yes* Are cables in machinery spaces, galleys, laundries, bathrooms and lavatories lead covered or run in conduit *Yes*

**Support and Protection of Cables, state how the cables are supported and protected** *Mains armoured and lead covered. Circuit wiring*

*armoured and lead covered.*

If cables are run in wood casings, are the casings and caps secured by screws — , are the cap screws of brass — , are the cables run in

separate grooves — If armoured and lead covered cables are secured by metal clips, are the clips spaced as per Table VIII *Yes*

**Refrigerated Chambers, are the cables and fittings in accordance with the special requirements —**

**Joints in Cables, state if any, and how made, insulated, and protected** *None*

**Watertight Glands and Deck Tubes, are all cables passing through decks and watertight bulkheads provided with deck tubes or watertight glands**

*Yes* **Bushes in Beams and Non-watertight Partitions, where unarmoured cables pass through beams and non-watertight partitions, are the**

holes efficiently bushed *Yes* state the material of which the bushes are made *Lead*

**Earthing Connections, state what earthing connections are fitted and their respective sectional areas** *Lead crossing a connecting*

*of cables efficiently boxed and searched*

are their connections made as per Rule —

**Alternative Lighting, are the groups of lights in the propelling machinery space arranged as per Rule *Yes* Emergency Supply, state**

position and method of control of the emergency supply and how the generator is driven —

**Navigation Lamps, are these separately wired *None* controlled by separate switch and separate fuses — , are the fuses double pole —**

are the switches and fuses grouped in a position accessible only to the officers on watch —

has each navigation lamp an automatic indicator as per Rule — **Secondary Batteries, are they constructed and fitted as per Rule —**

**Fittings, are all fittings on weather decks, in stokeholds and engine rooms and wherever exposed to drip or condensed moisture, watertight *Yes***

are any fittings placed in spaces in which goods are liable to be stacked in close proximity to them; if so, how are they protected —

are any fittings placed in spaces where inflammable or explosive dust or gases are liable to be present, if so, how are they protected —

how are the cables led —

where are the controlling switches situated —

are all fittings suitably ventilated — , are all switches and lampholders constructed wholly of non-ignitable, non-absorbent materials.

**Heating and Cooking Appliances, are they constructed and fitted as per Rule — , are air heaters constructed and fitted as per Rule —**

**Searchlight Lamps, No. of — , whether fixed or portable — , are their fittings as per Rule —**

**Arc Lamps, other than searchlight lamps, No. of — , are their live parts insulated from the frame or case — , are their fittings as per Rule —**

**Motors, are their working parts readily accessible — , are the coils self-contained and readily removable for replacement —**

are the brushes, brush holders, terminals and lubricating arrangements as per Rule — , are the motors placed in well-ventilated compartments in which

inflammable gases cannot accumulate and clear of all inflammable material — , are they protected from mechanical injury and damage from

water, steam or oil — are their axes of rotation fore and aft — , if situated near unprotected woodwork or other combustible

material, are the motors of the totally enclosed, pipe ventilated, forced draught, drip or flame proof type —

if not of this type, state distance of the combustible material horizontally or vertically above the motors — and

have machines of over 100 BHP been inspected by the Surveyors during manufacture and testing — **Control Gear and Resistances, are the generator**

field and motor speed regulators, starters and controllers constructed and fitted as per Rule — **Lightning Conductors, where lightning conductors**

are required, are these fitted as per Rule — **Ships carrying Oil having a Flash Point less than 150 F. Have the special requirements of**

the Rules been complied with regarding switches, joint boxes, section and distribution boards, protection of cables, method of distribution, lead of cables, lights and

fittings — are all fuses of the fitted cartridge type — are they of an approved type —

If portable lamps for use in dangerous spaces are supplied, are they of a self-contained, battery-fed type approved by the Home Office —

**Spare Gear, if the vessel is for open sea service have spares been supplied as per Rule —**

# PARTICULARS OF GENERATING PLANT.

DESCRIPTION OF GENERATOR.	No. of	RATED AT				DRIVEN BY	WHERE DRIVEN BY AN INTERNAL COMBUSTION ENGINE.	
		Kilowatts.	Volts.	Amps.	Revs. per Min.		Fuel Used.	Flash Point of Fuel.
MAIN	ONE	3	110	27.3	1000	Steam Engine.		
AUXILIARY								
EMERGENCY								
ROTARY TRANSFORMER								

## GENERATOR, LIGHTING AND HEATING CONDUCTORS.

DESCRIPTION.	CONDUCTORS.		COMPOSITION OF STRAND.		TOTAL MAXIMUM CURRENT AMPERES.		Approximate Length. (Lead and Return.) Feet.	Insulated with	HOW PROTECTED.
	No. per Pole.	Total Nominal Area per Pole Sq. Ins.	No.	Diameter.	Circuit.	Rule.

WORKSHOP MOTOR										
VENTILATING FANS										

All Conductors are of annealed copper conforming to British Standard Specification No. 7 (or International Electro-technical Commission Publication No. 28).

The Insulated Conductors are guaranteed to withstand the immersion and resistance tests specified in the Rules.

The foregoing is a correct description.

*J. Waters*

Electrical Engineers.

Date *9th March '37*

#### COMPASSES.

Distance between electric generators or motors and standard compass

*No compass fitted*

Distance between electric generators or motors and steering compass

The nearest cables to the compasses are as follows:—

A cable carrying	— Ampères	— feet from standard compass	— feet from steering compass.
A cable carrying	— Ampères	— feet from standard compass	— feet from steering compass.
A cable carrying	— Ampères	— feet from standard compass	— feet from steering compass.

Have the compasses been adjusted with and without the electric installation at work at full power

Has the effect of switching on and off circuits, motors and other electro-magnetic apparatus within the vicinity of the compasses been noted

The maximum deviation due to electric currents was found to be — degrees on — course in the case of the standard compass, and — degrees on — course in the case of the steering compass.

For LOBNITZ & Co., LIMITED,

*J. R. R. R. R.*  
Director.

Builder's Signature.

Date *11th Mar 1937*

Is this installation a duplicate of a previous case *No* If so, state name of vessel —

General Remarks (State quality of workmanship, opinions as to class, etc.)

*The electrical equipment of this*

*vessel has been fitted on board under special survey, tested under full working conditions and found satisfactory. The materials and workmanship are good.*

*12/3/37*
