If the frames, skin planking, or ceiling are of unusual thickness the breadth of vessel to inside of ceiling should be reported if possible.

In vessels obtaining an allowance for deck erections under Para. 11 where the sheer drops abaft amidships the height of the R.Q.D. is to be taken from the level of the top of the amidships beam.

In flush-decked vessels the total standard mean sheer means the sheer measured at the stem and stern-post. In vessels having poops and forecastles, it means the sheer measured at points distant one eighth of the vessel's length from stem and stern-post.

2m.11. T.

Liu Rot 23/8/15.

State dimensions of freeing port area on back of this form.

The Surveyor should state whether the fall in sheer as reported is measured relatively to the straight line of keel or to the water line. If measured relatively to water line the vessel's draft at time of survey and also in usual condition forward and aft should be reported.

MARKING FORM

RECEIVED 1 FEB 1926 MARKING REPORT

RECEIVED 25 JUN 1915

Lloyd's Register Foundation

W536-0254

Do all the Frames extend to the top height in the Poop? Yes Raised Quarter Deck? ✓ Trunk Bridge House? Yes Forecastle? Yes.
 To what height do the Reverse Frames extend? in Motorroom all to deck. remainder of vessel single angle frames.
 Has the Poop ~~R. Q.D.~~ Deck an efficient Iron Bulkhead at the fore end? Yes.
 Give particulars of the means for closing the openings in Bulkhead no openings in ~~poop~~ front R. Q.D.
 Is the Poop or Raised Quarter Deck connected with the Bridge House? ✓ Has the Bridge House an efficient Bulkhead at the fore end? ~~Ridge house~~
 Give particulars of the means for closing the openings in Bulkhead ✓ on ~~poop~~ deck not extending to the sides
 What is the thickness of the Bridge Front plating? ✓ and Coaming plate? ✓ see sketch below.
 Give scantlings and spacing of the Stiffeners ✓
 Are bracket plates fitted at each end of the Stiffeners? ✓ Are hor'l. brackets fitted connecting Bridge Bulk'd. with Bulwarks? ✓
 Has the Bridge House an efficient Iron Bulkhead at the after end? ✓
 How are the openings closed? ✓
 Is the Forecastle at least as high as the main or top-gallant rail? Yes Has the Forecastle an efficient Iron Bulk'd. at after end? Yes
 Are the Engine and Boiler openings covered by a Bridge, Poop, Raised Quarter Deck, or enclosed by a Strong Iron or Steel Deckhouse? ✓ covered by deckhouse on ~~poop~~ deck.
 If the openings are not so protected are the exposed parts of the Casings efficiently constructed? motorrooms ~~sky~~ light above deckhouse.
 Give thickness of plating; scantlings and spacing of Stiffeners.
 What is the height of the exposed Casings? height of deckhouse Are suitable means provided for closing all openings in them in bad weather? Yes.
 7' 6" in below
 Are the Weather Deck Hatchways efficiently constructed and at least equal to the requirements of Section 28 of the Rules for 1904-5? Give particulars below:— all hatches steel above oil compartments and above foreholds and closed with steel screwed covers.
