Messrs. Lloyds Surveyors,
Sunderland.

*Deptford Yard,
Sunderland.*

24th July 1913.
(Thursday).

Sirs,

S.S. "Lucellum" No: 642.

We enclose herewith a sketch showing the curve of placement and tons per inch curve, on examination of which I think you will find that they would give an allowance of about 6" for fresh water mark in the above steamer, as against 6" normally assigned. We shall be glad if you will wire us in the morning confirming this and amending the F.W. mark as used.

Yours faithfully,

SIR JAMES LAING & SONS, LIMITED,
