

COPY.

WILLIAM THOMAS BADGER will say :-

I am an Electrical Engineer to Lloyd's Register of Shipping stationed at Newcastle.

I surveyed the whole of the electric light installation and also the installation of the Echo Sounding Device on the S.S. "SHEAF BROOK" between the 1st and the 19th November, 1935. The vessel was surveyed afloat and in dry dock at Messrs. Swan, Hunter & Wigham Richardson's Yard at Wallsend-on-Tyne.

I produce a copy of my Report to Lloyd's which deals with the matters investigated by me.
