

Tanker "PETERJO" ex "MARYAD"

This case has been discussed with Mr. van Riel, the Owners' Technical Representative, and it appears from what he says that the Owners are anxious to have the vessel classed in the Society's Register Book, and that, in the circumstances of an ordinary repair, they would have had no hesitation whatever in complying fully with any recommendations made by the Surveyor.

In this case, however, the repairs are of such a nature that, while it is realised that a percentage of the rivets are of this quality, it is impossible definitely to state where they are placed.

In these circumstances it is submitted the matter be referred to Mr. Dobson, Marseilles, and he should be asked to use his discretion in the matter and to discuss the case with Mr. van Riel, who is proceeding to Marseilles for that purpose.
