THE HARBOUR DOCK YARD,

WEST HARTLEPOOL.

January 3rd, 1905.

Messrs Lloyds Surveyors,

West Hartlepool.

Dear Sirs,

S.S. "Germanic"

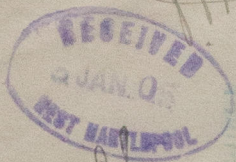

We enclose you herewith sketch shewing the extent of houses and other erections on the bridge deck of this vessel for your guidance in arriving at the proportion which should be added to the equipment number. Our view of the matter is that those houses alongside the Engineers casing should be exempt as it is distinctly laid down in your rules that the engine & boiler casings are not to be included & the fact that these houses are fitted against these casings should not be taken into account in making up the number ~~and~~ We certainly think, to take an extreme view of the case, that not more than the proportion of houses outside the casings can only be taken into account.

Yours faithfully,

FOR IRVINE'S SHIP BUILDING & DRY DOCKS CO. LIMITED.
