

W567 - 0021

of "War Edensaw"

This vessel's machinery was constructed under Special Survey at Toronto, & was installed at New Westminster B.C. it is in accordance with the Rules & has been satisfactorily reported upon.

The Society's Surveyor from Philadelphia now reports that he has examined the arrangement of the boiler feed pipes, a new feed pump & a new arrangement of pipes have been fitted.

The main safety valves have been altered to enable the valves to close within reasonable limits.

It is submitted that  
this vessel is eligible for  
THE RECORD. + LMC 11.18. F.D.

Subject to an air vessel being fitted to the discharge side of Wen's pump, & to a connection being made from the main to the auxiliary line of feed piping.
