Lloyd's Register of Shipping,

FALMOUTH,

25th October, 1933.

Dear Sir,

We enclose herewith Reports Nos 8144 & 8145 on the General Examinations carried out on the Hulls of the s.s. "PAKIPAKI" & "PIPIRIKI" and with regard thereto have to state that the Reports and Interim Certificates for the Machinery of the vessels are being deferred until the machinery has been examined under steam.

Opportunity was taken at low water to examine the propellers and the after ends of the screwshafts and stern tubes and it is considered that the vessels need not be docked for the examination of the screwshafts.

We have not been able to make definite arrangements for examining the machinery under steam but will forward reports as soon as this has been done.

We are, Dear Sir,

Yours faithfully,

The Surveyors,

signed per R.Moffitt.

The Secretary,
LONDON.
