

It is submitted the Hull Surveyors should be informed that Messrs. T. Wilson Sons & Co. state that their S.S. "MARENGO" will be placed in dry dock towards the end of this week, and as they further state that certain indications of weakness have been shown in this vessel at various times, mostly about the fore peak and in way of No. 1 hold, Mr. Wilson, the Principal Surveyor, should make a careful examination of the vessel when in dry dock and report fully upon the same to this Office.
