

Mitsui Bishi Co 191 vessel

In this case the Turbine Engines have been built under Survey at Newcastle, the boilers at Glasgow, & the Condensers & Auxiliaries are being made at Nagasaki.

Messrs Brown Macfarlane & Co have undertaken to be responsible for the fees, & they have been informed that the fee charged in this country would be based upon the power, so as to be the same as would be charged for ordinary engines of the same power.

If the whole survey had been completed in this country the fee for Survey would be charged on a horse HP of $\frac{1}{2} \left(\frac{16800}{6} + \frac{37661}{12} \right) = 2970$

or £ 168. 10.

The Glasgow Surveyors have charged £48. 10 for the survey of the boilers. It is submitted that a charge of £50. 0. 0 be made for the survey of the Turbine Engines.

The Nagasaki Surveyor will make a charge for the survey of the Condensers & Auxiliaries & for the survey of the erection on board. He should be informed of the charges made in this Country.
