

T.S.S. "ORITA"

In September last the Owners were asked, through the Liverpool Office, if they would agree to certain information regarding the survey held on the No.5 double bottom tank being furnished to Lloyd's Underwriters, the latter having requested to be furnished with this in view of claims for damage to cargo through leakage from this tank.

The Owners raised no objection, and the information was communicated to Lloyd's, but the latter now desire to know if they may furnish this to another firm, Messrs. W.K. Webster & Co. whose Underwriters also sustained substantial loss through this leakage.

It is a matter for consideration whether this request might be agreed to.
