

Nwe. 66011 RF
69 Dm. 15.

Case of the Steamer "HUNTRESS".

RETAIN

The Chairman, Deputy-Chairman and Chairman of Classification are very anxious that all necessary steps should be taken to prevent a recurrence of the difficulty in which the Committee were placed in this case.

In particular, it is desired that in future cases of a like nature where cablegrams are received of so serious a character as those sent by the Society's Surveyor at Durban, immediate steps should be taken to have the case stated up for submission to the Chairman of Classification and, if thought desirable, to the Classification Committee, so that the matter can be duly considered and suitable action taken thereon.

The following gentlemen before whom Reports of Survey may come are requested to read the papers in connexion with this case, and be guided accordingly in future, viz:-

Mr. SNEDDON

Mr. WATSON

Mr. CAREY

Mr. BRADSHAW

Mr. S. A. HILL

Mr. A. S. HILL.
