of "San Eduardo".

New Rpt No 63484

It is submitted, that before this case receives the consideration of the Committee the Newcastle Surveyors should be requested to forward a report & plan of the apparatus fitted for burning oil fuel in this vessel's boilers, explaining the system used & whether the oil used on the occasion of the recent accident was of low flash point.

They should also state whether all the conditions contained in the extract sent to them on the 30th August have been fully complied with, stating the way in which each condition has been met.
