

11.11.11
Certificate of Adjustment of Compasses.

This is to Certify that the Compasses of the Iron (Steel).....
1 " *Baltara* " O.N. *124676* have been Adjusted for Local
magnetic Deviation, and are now in perfect order. Tables showing the effect of such Deviation
this day been handed to the Master. The Deviations have been ascertained on the various
es, both with the Dynamo stopped and with it running at full speed, with the Electric
nt "on" and "off"—all circuits in the vicinity of the compasses.

The Deviations so found are practically identical under both conditions, and are in
dance with the Tables furnished this day to the Master.

Dated at *London* this *20th* day of *April* 19 *24*.

T. Hunter
Compass Adjuster.
