

Messrs.W.J.Yarwood & Sons' Yard No.375.

The Liverpool Office forward a letter from the Builders in which they state that three fuel tanks for the above vessel have been made by Messrs.Keep's Construction Co., Birmingham and delivered at their Works without being examined by the Society's Surveyors.

The Surveyors at Liverpool state that the tanks have been examined **full** of fuel and found tight, and that the Owners have agreed to their being accepted.

It is submitted that in the circumstances the tanks might be accepted in this instance.
