

s/s "City of Alexandria"

This vessel was built at Geestemunde in 1905 & classed with the Germanischer Lloyd.

The machinery has now been submitted for survey with a view to its classification with this Society.

Plans of the boilers, shafting & pumping arrangements have been submitted & found to comply with the Rules for a working pressure of 205 pounds per square inch.

The Survey has now been satisfactorily reported upon except the condenser which was found thin at the after end.

It is submitted that
this vessel is eligible for
THE RECORD LMC 1. 21. F.D.

S 1. 21.

205 lb. (S)

Subject to the after water end of the main condenser being renewed at the first opportunity.
