

"LA CRESCENTA"

The following suggestions are offered:-

1. That it would be desirable the enquiry should be of a general nature, and that the last part of the second paragraph of the draft letter should read:-

"....or in what respects the Instructions given
"to the Society's Surveyors with regard to surveys
"are susceptible of strengthening or improvement."

2. The object of the enquiry is to have the meaning of the sentence in the Wreck Commissioner's Report elucidated, and it is submitted for consideration whether the final sentence in the draft letter should be included, or whether it would not be better to replace it by one expressed somewhat as follows:-

"The Committee would therefore greatly appreciate
"any assistance the Board can give them towards
"making clear what points the Commissioner had in
"mind in making the observation quoted above."
