

Dublin,

S.S. "ANGERMANALFVEN" 1914.

Mr. McLaren, of the Hudson Bay Co. has called here and stated that they have taken over the above ex-German Steamer <sup>from the Shipping Controller</sup> and it is desired to class her with Lloyd's Register. He has brought in two plans, one of midship section, and the other of profile and decks, and he would like to have these examined with a view to classification.

He was requested to furnish a sketch of the boilers, if practicable.

He states the vessel is at present in dock at Cardiff undergoing repair of damage.

It is submitted the Cardiff Surveyors might be communicated with and instructed to give their attention to the vessel while undergoing repair in drydock, with a view to dispensing with a second docking, should it be determined to proceed with the classification.
