

Chief Ship Surveyor

Received from Chief Ship Surveyor

NAME Wood Tug "SIMS"

Rpt. Hol.

No. 31635

Remarks of the Chief Ship Surveyor are desired on this case for the consideration of the Classing Committee.

("The endorsement to contain a succinct summary of any repairs that have been required and to show the cause or causes of such repairs, and also to bring out clearly any exceptional features in connection with the case, so that the Classing Committee may have all the salient points presented in the endorsement."—Extract from Sub-Committee's Report, 24/5/92.)

of Survey

1st Entry

It would appear in view of the yard number that this is the vessel that was already planked, when plans were submitted for classification; the Surveyors should therefore be requested to state if they are correct in recommending the Special Survey mark.

The Surveyors should also state whether, before being planked, anything in the nature of the requirements of footnote b table I of the composite rules, had been carried out, and whether 2 thick strokes of planking are fitted at bilge or 3 as shown on approved plan.
