s. s. "STAR OF ALEXANDRIA".

A general examination was held at Liverpool on the 16th instant in connexion with the postponement of the completion of the 2nd S.S.No.2 due 9,32.

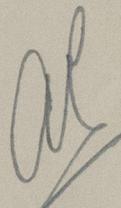

A fee of £5.5.0. for the hull and £5.5.0 for the machinery was charged for the inspection.

The Owners state they do not take objection to the £5.5.0. charged for the survey of the hull, but consider that the £5.5.0. charged for the machinery is excessive, especially as £4 was paid for the boiler survey held in July last.

It is observed that only one visit was paid in connexion with the machinery survey in question and that in the case of another vessel belonging to the same Owners fees of £5 for the hull and £2 for the machinery were charged.

In the circumstances it is submitted that the fee for the survey of the machinery held at Liverpool on the 16th instant should be reduced to £2.
