

D. G.
Mr. Brewer of Messrs. Thomas Pinkney & Co., rang up on the telephone and stated that the Steamer "MEMPHIS", which is now at Southampton, has been under survey and the Board of Trade have extended her certificate for six months. The vessel was however undocked before the Society's Surveyors were able to examine the bottom, and Mr. Brewer desired that the Surveyors might be written to and asked to furnish their certificate without this examination. He stated that the vessel had to be undocked to admit of another vessel being docked, but that she would be placed in dry dock again in the course of the next few months.
