

020240

s.s. "NIRITOS".

Mr. Dracoulis called to-day and stated that this vessel was at present under survey at Rotterdam and that the Owners desired to fit her with the donkey boiler taken out of the Motorship "NESTOR", No. 30606 in Register Book, which vessel is now classed with the American Record but was formerly classed with Lloyd's Register.

He stated that the Rotterdam Surveyors had informed the Owners' Representative that it would be necessary to obtain approval from this Office before the boiler could be installed. Mr. Dracoulis would like to be informed before 4.0'clock this afternoon in the matter.

13. 1. 38.

W650009

If the Rpt. Surveyors can
satisfy themselves that the Boiler
was previously cleared with the
Society - it could be fitted in
the Mirror, if found in
good condition.

The Surveyor should state the
identification marks on the
Boiler, and if there is no
available Certificate
they should take a note
of the principal
dimensions & forward
the information to
this office for
comparison with
the information
on the J.E. kept
on the vector
