

Lloyd's Register of Shipping.

95, Bothwell Street, Glasgow, c.2.

2nd Sept. 1935

Dear Mr. Ward,

I regret to say that you are quite right about the suction to the dry tank in the Argentine Transport being connected to the helge line. Unfortunately I took the chief Draughtsman word that they were connected to the ballast line.

The capacity of the dry tank is 72 tons and the length 16'-3" and I shall be obliged if you will make the necessary correction.

I have conveyed your kind regards to all your old friends in Glasgow who represent some

Yours sincerely

Henry Thomson
