

S.S. "RABAT"

This vessel is under Survey in Hamburg with a view to classification in the Society's Register Book, and the Superintendent of Messrs. R. Macandrew & Co. has phoned stating that the Survey is being delayed pending a decision in regard to some doubling plates, which he states Mr. Dykes was referring to this Office.

No information has come from Mr. Dykes on the point.

It is submitted Mr. Dykes be informed by wire that the Owners have called, and that as the matter has not been referred to this Office, it is presumed that on carrying out the Survey he has found that the plates are of increased thickness, thus not necessitating the fitting of the doublings referred to.
