Report, No. 23272 Port Rot  
Vessel has Water Ballast Tanks, state whether the manhole covers have been removed, and the insides examined. Also state the amount of deterioration (if any) found in the thicknesses of the floors, framing, of the inner bottom plating, especially in the boiler space.

Surveys, when held, must be reported in detail and serially in the terms of the Rules. State clearly the repairs, if any, and, in detail, the nature and extent of Examinations and subsequent repairs. Repairs of Damage (the cause of which must be stated) should be separated from Repairs due to other causes; as being detailed in the body of the report, should be summarised in the form shown below. Whenever the nature of Anchors or Chains is reported the particulars should be clearly stated in the space provided on of this form. State also the dates and initials of any letters respecting this case. H. 19.3.35  
Cases where the Surveyor has not made a special damage report he is required to state whether he is services for this purpose and to whom and why they were declined  
Was a damage report made by anyone else? If so, by whom?

OR EXAMINATION AS PER RULE, FOR General examination.

Observations, Opinion as to Class, Recommendation, &c.:-  
State clearly whether any and, if so, what alteration is suggested to be made in the existing classification and notification of the vessel in the Register Book consequent upon survey, thus, for example:- "to remain as now classed in the Register Book without fresh record of Survey," "to remain as classed and to have record of survey," "to remain as classed and to have record of survey, 1,2,4, and the notations of ss No. 1-24 and ptND24, &c."

The vessel is as far as examined in a fit condition to proceed to Italy and eligible in my opinion to remain as classed, without fresh record of survey, and with notation one lower anchor missing
