

S.S. "MAID OF SPETSAI".

It is submitted that before this case receives the con-
sideration of the Committee, the Newcastle Surveyors should
be informed that the Rules only require non return valves *from coil or*

Scaffee pipes
1

when the discharge is below or near the load water line.

The Surveyor should explain what he means by tank side line.

Does this refer to the double bottom tank or the fore peak
tank?.
