

Steamer "TRECI".

The papers in this case were shewn to Mr. Douglas Garrett this afternoon, who expressed the opinion that the Salvage Association should be informed of the full facts. He added that the letter to them should contain a summary of Mr. Brown's confirmatory remarks in his official communication of the 17th instant, and that his further remarks, as contained in his semi-official letter of the same day should be introduced by a statement to the effect that "Mr. Brown had volunteered the following additional information in regard to the statements contained in his Affidavit".

25th February, 1935.
