Received by Chief Ship Surveyor 18.7.01

Received from Chief Ship Surveyor

VESSEL'S NAME Twin S.S. Mongolia Report Tri No. 645

The remarks of the Chief Ship Surveyor are desired on this case for the consideration of the Classing Committee.

("The endorsement to contain a succinct summary of any repairs that have been required and to show the cause or causes of such repairs, and also to bring out clearly any exceptional features in connection with the case, so that the Classing Committee may have all the salient points presented in the endorsement."—*Extract from Sub-Committee's Report*, 24/5/92.)

Nature of Survey 1st entry

It is submitted the Trieste Surveyors be informed that as the freeboard is a condition of the Vessel's Class, a certificate of Classification cannot be issued until the freeboard has been verified by them, and reported to this Office.

They should be requested to state whether they drew the Builders attention to the stream chain, the weight of which is 1 cwt., or 1.53 per cent less than required by Table 22. It is concluded the water ballast tanks have been tested as required by the Rules, but they should state if this is so, as it is not stated on their report.

Lr. to Trieste 18/7/01.
