

Report of Survey for Repairs, &c., of Engines and Boilers.

(Received at London Office)

MUN.AUG. 29 1921

Date of writing Report 10th AUG. 1921 When handed in at Local Office

10 Port of HAMBURG

No. in
Reg. Book Survey held at HAMBURGDate, First Survey 11th July. Last Survey 12th Aug. 1921.
(No. of Visits 12.)

100 Gross tonnage 4198 on the Machinery of the Wood, Iron or Steel Sc. S. T. H. SKOGLAND or Survey Master

YEAR MONTH

Net tonnage 3569.

Registeredorse Power 275

No. of Main Boilers 2

No. of Donkey Boilers 1

team Pressure in Main Boilers 100lb.

in Donkey Boilers -

Vessel built at HAMBURG By whom BLOHM & VÖSE.

When 1915

Engines made at HAMBURG By whom BLOHM & VÖSE.

When 1915.

Boilers, when made (Main) 1915 (Donkey)

Owners T. H. SKOGLAND.

Port NEWCASTLE Voyage SOUTH AMERICA.

If Surveyed Afloat or in Dry Dock Afloat

Particulars of Classification (which must be inserted precisely as in Register Book & Supplements).

CHARACTER.	Years Assigned or Expired.	Machinery and Boiler Surveys (including date of N.B., if any).
For Special Survey.		
Date of last Survey and of Periodical Surveys.		

Last Report No. -

Port

Particulars of Examination and Repairs (if any) Clas

Periodical Surveys, when held, must be reported in detail and serially in the terms of the Rules. State clearly the cause of Repairs, if any, and, in detail, the nature and extent of Examinations and subsequent Repairs. Repairs on account of Damage (the cause of which must be stated) should be separated from Repairs due to other causes; and besides being detailed in the body of the report, should be briefly summarised at the end of the report. State also the dates and initials of any letters respecting this case.

1 damage cases where the Surveyor has not made a special damage report he is required to state whether he offered his services for this purpose, and why they were declined?

Was a damage report made by anyone else? If so, by whom?

Did the Surveyor personally go inside each Main Boiler separately and make a thorough examination at this time? Yes

Do.

Donkey

"

"

"

this was not done, state for what reasons?

And what parts of the Boilers could not be thus thoroughly examined? None.

Is what special means, in the absence of internal examination, were adopted by the Surveyor to assure himself of the thorough efficiency of those parts of each Boiler?

Did the Surveyor examine the Safety Valves of the Main Boiler? Yes

To what pressure were they afterwards adjusted under steam? 200 lb.

Did the Surveyor examine the Safety Valves of Donkey Boiler?

To what pressure were they afterwards adjusted under steam?

Did the Surveyor examine all the manholes, doors and their fastenings of the Main Boilers?

, and of the Donkey Boiler?

Did the Surveyor examine the drain plugs of the Main Boilers?

, and of the Donkey Boiler?

Did the Surveyor examine all the mountings of the Main Boilers?

, and of the Donkey Boiler?

Has screw shaft now been drawn and examined? No Is it fitted with continuous liner?

or two liners? or is it without liners?

Has shaft now been changed? No If so, state reasons

Is the shaft now fitted new? No Has it a continuous liner?

or two liners?

or is it without liners?

State the distance between lignum vitae of stern bush and top of after bearing of screw shaft?

If the Survey is not complete state what arrangements have been made for its completion and what remains to be done? Now complete.

Examined all cylinders, piston, slide valves & chocks working park, crank shafts & main bearings, crankpin brasses, thrust shaft & block, line of tunnel shafting, condenser, pump, pipes & connections, auxiliaries, main boilers internally & externally, their mounting as well as under steam & found all of these parts in order after the following repairs had been carried out:

H.P. - piston springs renewed, slide valve chock bored, new packing rings for slide valve fitted new.

I.P. piston springs renewed.

All main bearings & crank pin brasses adjusted; all crosshead journals skinned up, crosshead brasses remitted & adjusted, guide shoe planed up, guides adjusted. See Continuation.

General Observations, Opinion, and Recommendation:-

(State clearly what alteration, if any, is suggested to be made in the existing classification of the vessel's machinery in the Register Book, consequent upon this survey, and also any alteration required to be made in the records of the vessel's machinery, boilers, working pressures, &c.: thus, for example, B.S. 6.11, B.C.H.S. 9.11, or E.L.M.C. 9.11, 140 lb., B.D., &c.)

100 The vessel so far as seen is in good & efficient condition & eligible in my opinion to have notification of "L.Y.T.C.-8.21" in the Reg. R.R.

Survey Fee (per Section 28) £ 5/-

Special Damage or Repair Fee (if any) £ 30/-

Travelling Expenses (if chargeable) £ 2/-

MON. AUG. 29 1919.

S.S. "T. H. EXOGLAND" ex "TARANTU"

Condenser tested. Oil separator sheets renewed. Main stop valve skinned & ground in.

Pump: Sanitary piston rod skinned.

Steam feed pump: water end piston rings renewed, all valves & seats dressed up. Steam end piston rings fitted new.

General Service: one water end cylinder cover renewed, all valves & seats overhauled, & dressed up.

Gallant pump: Steam end piston rings renewed - all valves & seats overhauled.

Circulating pump: Steam cylinder bored out, piston completely renewed, engine adjusted.

Feed heater: coils repaired & tested.

Boilers: all furnaces after landing in combustion chamber riveted, leaking seams repaired by electric welding. - furnace jacked up: - one crack in Port wing furnace of Port Boiler almost corrugation electric welded. All mountings faced up & ground in. Superheater elements removed, fairied, tested & replaced. Safety valves adjusted to 100 lbs.

Machinery tested under working conditions & found acting satisfactorily.

Hamburg 18/8/21.

Friedrich Witt
