

W696-0174

S.S. "I S I S".

The reports on this case have been forwarded to the Liverpool Office.

The Owners' Superintendent wires that they have taken delivery of this vessel. The survey for classification is in hand and the Owners are willing to accept the examination of the screw shaft made by the Society's Surveyors in June 1920, provided that examination is accepted for classification.

It is submitted the examination of the screw shaft in June last might be accepted in this case unless the Surveyors require it to be again drawn in for some special reason.

The Liverpool Surveyors should be advised accordingly by wire.
