COPY.

Copy of Classing Letter addressed to the Newcastle Surveyors on the 3rd June, 1902.

43425 "POTOMAC". Deferred for the Owners' consent to the deviation from the Rules as regards the laying of ceiling only under the hatchways and over the limbers in this vessel.

I have to request that you will inform the Builders, in answer to their letter of the 27th ultimo, which was placed before the Committee at their meeting today, that approval for the omission of ceiling from the inner bottoms of vessels intended to be classed in the Society's Register Book has hitherto been given by the Committee only when the Owners written consent has been previously obtained to this departure from the Society's Rules. In the case of the "POTOMAC" it will therefore be necessary that the Owners' written consent to the omission of the ceiling should be produced before the certificate of classification can be issued, and the Committee will feel obliged if the Builders will kindly obtain this.
