Dear Sirs,

Boilers Nos. 506-7.

We enclose a tracing showing an amendment which we propose to make in the above Boilers, i.e. fit only one stay at the side of each wing furnace instead of two, and fit $\frac{1}{2}$ " doubling plates to the back plates as shown on the accompanying sketch, and we will be glad to hear if this arrangement meets with your approval.

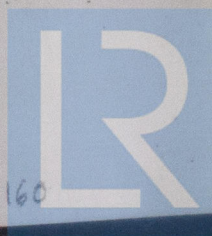

Yours truly,

For HUTSON & SONS, Ltd.,
