Messrs. The Surveyors to Lloyds Register of  
Shipping,  
Collingwood Buildings,  
Collingwood Street,  
Newcastle-on-Tyne, 1.

Dear Sirs,

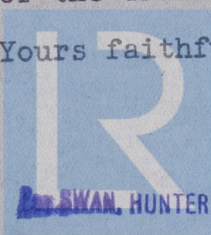

Machinery No. 1624.

With reference to your letter of the 24th inst., the  
discharge pipe from the transfer pump to the gravity tank is 4"  
bore.

As you consider that the size of the drain tank should  
be greater than given on drawing No.B.886 if the above pipe  
exceeds 3" bore, we propose to make the tank about 50% greater in  
capacity. We consider this increase to be ample, as the transfer  
pump capacity and size of discharge pipe to the gravity tank were  
the same on M.S. "Port Jackson" our No.1504, and a drain tank of  
the same capacity as shewn on drawing No.B.886 was fitted.

We shall be pleased to receive your approval of our  
proposal. A revised drawing of the drain tank will then be sub-  
mitted.

Yours faithfully,

Lloyd's Register
