

S.S. "CRETECABLE"

This vessel was built under the Special Survey of this Society's Surveyors at Sunderland.

The Engines made by Messrs. McColl & Pollock and the boiler made by Messrs. T. Hill & Sons, have been surveyed and installed under the supervision of the British Corporation Surveyors, and the certificate issued by them is attached hereto.

As it is provided in the Committee's circular letter dated the 6th March 1918, that in such cases the Society will issue the Machinery Certificate with the notation of LMC with date in red, it is submitted that the vessel is now eligible for the record of LMC 11.19.
