

December 4th 1906.

Sirs

The machinery for L.B. No 90
by Goole L.B.C. has been dispatched
from the Works of Messrs Boulton & Co
St Garmouth before being finally
examined in a completed state.
When last seen the connecting rods,
link motion & details had not been
erected nor the condenser tubes fitted.

To complete the survey for
classification these details require to
be examined:—As you will know the
shafting & propellers have not been
to Garmouth at all—the machinery
will be fitted & completed at Goole.

I am, Sirs,

Yours faithfully
A. G. B. Smith
