

S.S. "SPIRAL"

This vessel was built in 1906 to class with the Norske Veritas and the Owners now desire to have her classed with this Society. The Hartlepool Surveyors have submitted plan of the main boilers and particulars of the shafting. The boilers have been examined and the dimensions and scantlings have been found to be in accordance with the drawing. The intermediate and screw shafts are in accordance with the Society's Rules provided the propeller is not more than 11 feet in diameter. The crank and thrust shafts are .04 smaller than required by the Society's Rules.

It is submitted that in the circumstances this vessel's machinery might be approved for the record of LMC with date, when a satisfactory report has been received.

Working pressure 180 lb.
