Screw Steamers Nos. 6 & 7 proposed to be built by
Northwest Steel Co. with a view to class 100A1.

Dimensions: 410.45 x 54 x 29.75

These vessels are proposed to be built as duplicates
of the same Builders' S.S.No. 5, in which case a proposal
to dispense with the intermediate bulkheads in the forward
and after holds was approved, subject to a notation being
made in the Register Book and to a letter being received
from the Owners in regard to the arrangement of the bulkheads,
plans being approved by Mr. French on the 15th June last.

It is submitted that provided a satisfactory
certificate be received on completion, the vessels will be eligible
to be classed 100A1, subject to a letter being received from
the Owners and to a notation being made in the Register Book
in regard to the omission of the intermediate bulkheads in
the forward and after holds.
