ENCLOSURE.

3rd February, 1919.

Dear Sir,

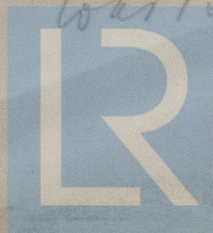

With reference to Report No.5, received through your Office from the Surveyor at Metagen River on the wood sr. "RICHARD B. SILVER", I have to state that although the tonnage of the vessel is more than was contemplated, due to the increase in the dimensions, the scantlings and arrangements have been approved by the Committee, and the vessel has accordingly been classed 12A-, with a notation of "salted" and subject to the condition that a Special Survey equal to a Half Time Survey is held at 4 and 8 years.

I enclose the Certificate herewith, and shall be glad if you will pass it on in due course.

I am, Dear Sir,
Yours faithfully,

The Secretary,
NEW YORK.

Secretary.
