

m.v. "ARNUS"

Copies of the classification certificates on the hull and engines of the m.v. "ARNUS" were supplied yesterday to Messrs. Cia. General de Tabacos de Filipinas.

This Company now state over the telephone that when the original documents reached them a short time ago there were three certificates from this Society, and they wished a copy of the third certificate to be sent to them.

In the course of conversation it appears that the certificate to which they refer is the boiler test certificate, and it is submitted that the Newcastle Surveyors be asked to issue a copy of certificate No. 9686 relating to the boiler on board this vessel.
