

s.s. "CADILLAC".

The Anglo American Oil Company are proposing to renew this vessel entirely in way of the cargo tanks.

It is proposed to invite tenders immediately for the reconstruction of the middle part of this ship as stated above, and to join on the existing forward and after ends.

The vessel is due for Special Survey No.3 in December next.

The work of reconstruction is to be started immediately and it is expected that the new part of the ship will be ready in March next.

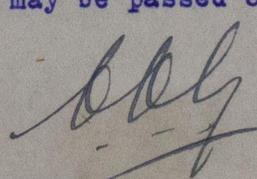

The Owners' proposal to run the vessel in her present condition until March 1930 is submitted for approval.

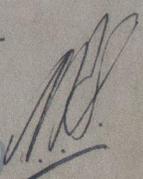

Mr. Bryant, representing the Owners, has called at this Office and handed in a plan of midship section and a specification with regard to the work to be done to the new part of the vessel in way of the cargo tanks.

The Owners' proposals represent in nearly all cases additions to the present structure and are submitted for approval.

The signed copy of the midship section and the two signed pages of the specification with regard to the alterations have been handed to Mr. Bryant to take away, as the Owners specially desire to be in possession of this information tonight, so that it may be passed on *immediately* to the Firms who are tendering.
