

S.S. "JUSTICIA" 32120 Gross tons.

This vessel was launched in July 1914, and completed
in April 1917, two years and nine months after the date of launch.

It is assumed that the delay in completing the vessel
has been caused by the special difficulties with regard to labour
and material such as ^{are} now being experienced, ~~but the Surveyor~~
~~could be requested to state if this is the case.~~

He should also be requested to say if the vessel has
been examined in dry dock by him since she was launched, and
so, to give the date of such examination.
