No. 29604 Port Hull  
of Examination and Repairs (if any) Part 80.

When held, must be reported in detail and serially in the terms of the Rules. State clearly the nature and extent of examinations and subsequent repairs. Repairs on the cause of which must be stated should be separated from repairs due to other causes; and in the body of the report, should be briefly summarised at the end of the report. State also the any letters respecting this case.

Where the Surveyor has not made a special damage report he is required to state whether he offered his services for this purpose, and why they were not.

Was a damage report made by anyone else? If so, by whom? See Hull Rpt No. 29604

Normally go inside each Main Boiler separately and make a thorough examination at this time? yes

Donkey " " " yes

state for what reasons? ✓

Boilers could not be thus thoroughly examined? ✓

ins, in the absence of internal examination, were adopted by the himself of the thorough efficiency of those parts of each Boiler? ✓

amine the Safety Valves of the Main Boiler? ✓ To what pressure were they afterwards adjusted under steam? 180 lbs

amine the Safety Valves of Donkey Boiler? yes To what pressure were they afterwards adjusted under steam? not adjusted

amine all the manholes, doors and their fastenings of the Main Boilers? ✓ , and of the Donkey Boiler? yes

amine the drain plugs of the Main Boilers? ✓ , and of the Donkey Boiler? none

amine all the mountings of the Main Boilers? ✓ , and of the Donkey Boiler? yes

been drawn and examined? no Is it fitted with continuous liner? or two liners? or is it without liners?

changed? If so, state reasons

nd new? Has it a continuous liner? or two liners? or is it without liners?

etween lignum vitae of stern bush and top of after bearing of screw shaft? ✓

Complete state what arrangements have been made for its completion and what remains to be done? The donkey boiler valves to adjust at the first opportunity.

The Main boiler safety valves adjusted under steam  
The donkey boiler examined throughout and found in good working condition.

Observations, Opinion, and Recommendation: This vessels machinery  
alteration, if any, is suggested to be made in the existing classification of the vessel's machinery in the Register Book, consequent upon this survey, and also  
ion required to be made in the records of the vessel's machinery, boilers, working pressures, &c.: thus, for example, B.S. 9.11, B.&U.S. 9.11, or S.L.M.C. 9.11,  
able in my opinion to remain as classed with  
record of 70 10.16 on completion of the survey as above
