

Steel Screw Steamer "MONITORIA", No. 12 in Supp., built by Messrs. Osbourne, Graham & Co. in 1909, and classed 100A1.

---

With regard to the question which has arisen regarding what special designation, if any, should be made in the Register Book regarding this vessel, the following remarks are submitted for the consideration of the Committee:-

- (1) This vessel differs from other vessels principally as regards her form, and not as regards the methods adopted in her construction. So far as the construction of the vessel is concerned she only differs from ordinary steamers in respect of the curved angles attached to the main frames, which are necessary to secure the corrugated form of the side which is the characteristic of the type.
- (2) It does not appear that either the Owners, or the Builders, or the Patentees have expressed any desire for a special designation to be given to the vessel in the Register Book.

In these circumstances it is submitted that no special designation should be given to the vessel.
