by Chief Ship Surveyor 10.3.15.

Received from Chief Ship Surveyor

VESSEL'S NAME Stl.S.S. "WILLELLAN". Rpt. Sld. No 26378

Remarks of the Chief Ship Surveyor are desired on this case for the consideration of the Classing Committee.

("The endorsement to contain a succinct summary of any repairs that have been required and to show the cause or causes of such repairs, and also to bring out clearly any exceptional features in connection with the case, so that the Classing Committee may have all the salient points presented in the endorsement."—Extract from Sub-Committee's Report, 24/5/92.)

of Survey FIRST ENTRY.

It is submitted that before this case receives the consideration of the Committee the Sunderland Surveyors should be informed it is concluded that brackets are fitted at the tank margin on alternate frames in the double bottom tanks and requested to indicate on sketch in way of shallow part of double bottom the size of these brackets. They should also be requested to amend the midship section to agree with the vessel as built and the first entry as regards the size of the frames and reverse frames in double bottom at alternate frames.

With reference to the additional equipment required it is concluded that the vessel is returning direct to Sunderland from Rouen, and that arrangements will be made for this equipment to be examined immediately it is placed on board, and for a report to be forwarded without delay with a view to the classification of the vessel.
