

Messrs. W. Hamilton & Co.'s S.S. No. 232.

EQUIPMENT.

It is submitted the Builders be informed that when the midship section and profile of this vessel were submitted on the 17th November by Mr. Isherwood it was stated in his letter that it was the Builders' desire that this vessel should be constructed on the Old Rule basis.

It is noted that the equipment number as now proposed is based on the New Rule measurements. The old Rule equipment number for this vessel is 47771 and as the actual equipment is the same as that required under the new Rules and as proposed by the Builders the same will merit approval, provided the Owners' consent be obtained to the use of the  $2\frac{1}{2}$ " steel wire hawsers instead of the 7" hemp or manilla hawsers.
