

W891-0146

c/s "Figulina".

Nwc. Rpt. N° 64996

With further reference to the heating surface of this vessel's main boilers. It is submitted that it should be pointed out to the Newcastle Surveyors that they appear to have deducted the heating surface of the front tube plate of only one boiler whereas there are two boilers. & they should be requested to state the correct heating surface ~~and further amend their account.~~
