

COPY.

3rd March, 1906.

Gentlemen,

D.

With reference to your report No.50156 on the S.S. "ENOSIS" I have to draw your attention to the fact that Circular No.1089 states that the alteration in the Rules respecting the fitting of ceiling will not come into force until the expiration of six months, say until the 14th June 1906, but that it may be taken advantage of in the case of vessels already built and of those which may be built or contracted for before that date, on the request of the owners. You will thus see that it is necessary for the consent of the owners to be obtained in the present instance and I have to request that you will make this clear to the Builders with a view to the written consent of the owners being obtained.

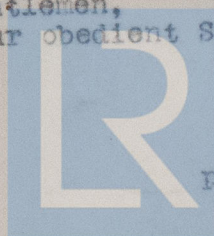

If the consent of the owners or their authorised representatives in this country can be forwarded by return of post, it is hoped that the case will be intine to receive the attention of the Committee at their meeting on Tuesday next.

I am, Gentlemen,

Your obedient Servant,

The Surveyors,

NEWCASTLE-ON-TYNE.
