

Inspected by Chief Ship Surveyor 3. 3. 06

Received from Chief Ship Surveyor _____

VESSEL'S NAME See S.S. "Erosis" Rpt. NWC No. 50156

The remarks of the Chief Ship Surveyor are desired on this case for the consideration of the Classing Committee.

(The endorsement to contain a succinct summary of any repairs that have been required and to show the cause or causes of such repairs, and also to bring out clearly any exceptional features in connection with the case, so that the Classing Committee may have all the salient points presented in the endorsement.—Extract from Sub-Committee's Report, 24/5/92.)

Nature of Survey First entry

It is submitted that before this case receives the consideration of the Committee the Newcastle Surveyors should be written to with reference to the omission of ceiling from the tank top of this vessel. Their attention should be directed to Circular No.1089 where it is stated that the alteration in the Rules respecting the fitting of ceiling will not come into force until the expiration of six months, say until the 14th June 1906, but it may be taken advantage of in the case of the vessels already built, and of those which may be built or contracted for before that date, on the request of the Owners. The Surveyors will thus see that it is necessary for the consent of the Owners to be obtained in the present instance, and they should make this clear to the Builders with a view to the written consent of the Owners ^{being} obtained.
